n.e.c. = not elsewhere classified. NOTE: Median age represents the midpoint in the age distribution such that half of workers are younger and half are older. Updated population controls are introduced annually with the release of January data. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 50,000). Effective with January 2025 data, industries reflect the introduction of the 2022 Census industry classification system, derived from the 2022 North American Industry Classification System (NAICS). No historical data have been revised. Data for 2025 are not strictly comparable with earlier years. Annual estimates for 2025 are 11-month averages that exclude October. (Data for October 2025 were not collected due to the federal government shutdown.) As a result, 2025 annual estimates are not strictly comparable with annual averages for other years.
